State Management: Redux Toolkit, Context API, Zustand

Backend Databases: Node.js, Express.js, .NET, MongoDB, PostgreSQL, MySQL, Firebase, RESTful APIs

Tools: VS Code, Visual Studio, Postman, Figma, pgAdmin, Android Studio, Axios, Chart.js, React Hook Form,

PROFESSIONAL STRENGTH

Soft Skills: Effective communication, client interaction, team collaboration, adaptability, quick learning, problem solving, time management, active listening, and interpersonal skills

PROFESSIONAL EXPERIENCE

Full Stack Developer

Immentia SMC Private Ltd

Shamsabad, Rawalpindi, PK

Nov 2025 - Present

- Developing React.js frontends connected to .NET and Node.js/MongoDB backends for client-facing features.
- Built the owner dashboard, POS checkout module, and ZATCA e-invoicing compliance panel for Vendix, a salon SaaS platform for the Saudi market.

Full Stack Developer

LALA Group of Companies

Shamsabad, Rawalpindi, PK

July 2023 - Nov 2025

- Built and maintained scalable React applications integrated with Node.js and PHP APIs.
- Optimized frontend architecture and API integration, significantly reducing load times and improving overall application responsiveness
- Implemented Redux across 10+ products for consistent, maintainable state management

Front-End Developer

MSK SOFTWARE HOUSE

Islamabad, PK

Jan 2023 – July 2023

- Built responsive React.js web apps with third-party API integrations
- Delivered scalable layouts focused on performance and UX

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Virtual University of Pakistan

PROJECTS

- **Vendix** — Salon SaaS platform for the Saudi market (ASP.NET Core MVC + vanilla JS). Built the owner dashboard (KPI cards, Chart.js analytics), sidebar/theme redesign, POS checkout module, and ZATCA e-invoicing compliance panel. · <https://pilot.vendix.com.sa/>
- **BizProbe** — Business review platform. Built the dynamic reviews page, homepage recent-reviews section, and hero search UI with tab filtering. · <https://bizprobe.com/>
- **EmployerNext** — Global job search platform, built with ASP.NET Core MVC (Razor) and vanilla JavaScript. Built the navbar, hero upload validation, and scroll-behavior fixes. · employernext.com.
- **Falak Software** — Software agency site, built with ASP.NET Core MVC (Razor) and vanilla JavaScript. Built core homepage sections: hero, services carousel, testimonials slider, and portfolio. · falaksoftware.com
- **ScamSoldier** — Essay writing service review platform. Built with .NET (backend) and vanilla JavaScript (frontend interactions). · scamsoldier.com
- **TripPlannerPK** — Pakistan travel booking platform for flights, hotels, visas, and Hajj & Umrah packages. Built with PHP (backend) and React.js (frontend). · tripplannerpk.com
- **Jamia Sohan** — Islamic seminary platform. Implemented Arabic/Urdu localization with custom RTL layout and font integration. · <https://jamiasohan.org/>
- **Expense Tracker** — Personal full-stack MERN project (React.js + Node.js/MongoDB), deployed on Vercel. · expense-tracker-front-end-seven.vercel.app
